

"Participate now to the story and think how you can help the kids and their parents, in august 2006. With only the potential that we have in the Balearic Islands by its land and its water, there is enough in order to get out, for a few days, some kids and parents of the daily catastrophe they live without the necessity to show pictures of its misery.

The automatic VW 1600L, year of construction 1971 fabricated in Wolfsburg, bought in Braunschweig, drove in Köln, change of holder in Ahrweiler, transported in Palma, parked and drove in Paguera, and now in the third generation of the family is also of service of the Spanish people.

It's correct, it's just a car, but it can obtain a lot thanks to its story in combination of signatures from nice, famous people, Spanish and German well-informed circles, the sensations you fell when you see it when you hear it with the double carburettor, its flat motor, the easy way to recognize it and the happy memories of the past.

When you run after an idea for a long time and you have faith in it, the idea will pass to the story. The train which we start to push 3 years ago is now rolling.

And all the best is: ANYONE can jump in this train and participate to the story which is helping everybody"
